

RICOH
Creative
Collaboration
for Interactive Whiteboard

The most important elements in any meeting are the people, so we put ourselves in the shoes of the employee, designing every interaction with his experience in mind, making it as simple and effective as possible. Improve collaboration experience for next meetings generation.

Benefits

- Reduce waste of time in meeting setup
- Increase productivity during the meeting
- Increase end-user technology adoption

Easy Content Sharing

Share content from the laptop or smartphone on the interactive whiteboard and take direct control of your device from the board screen. This is possible via an HDMI cable connection or wirelessly (without any app) via Miracast, Google Cast or Apple Airplay.

Launcher Screen

Simple launcher screen assists the users to easily choose preferred application.

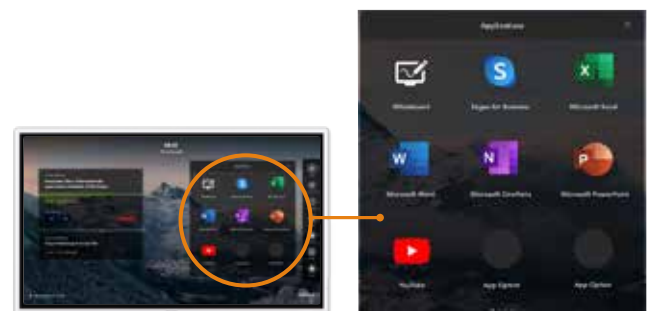

Split Screen

Display multiple devices at the same time for more productive and collaborative discussions.

Interactive Touchback

Operate your device from the interactive whiteboard wirelessly with touchback function. User can directly interact with the shared content. *Supports Windows 10 and Android devices only.

Any Windows10 Applications

Customize your board with any Microsoft Windows 10 app. All the applications will be always available in the app folder for a simple and safe activation.

Powerful Canvas

Collaboration on the interactive whiteboard has never been so simple. Any type of content will be available on the screen (web browser, video, images, files) in a single virtual canvas. The canvas can be shared on your personal device using a QR code so other users can interact simultaneously.

Insert various types of files

Various types of files including presentation, spreadsheet, PDF, web browser and video etc. can be inserted on the canvas. Once the file is open, annotation is still available for users to draw around the file or web page as well.

Recap & Clean Up

Recap allows users to select which pages and files to email, or save them to a USB drive or the cloud. Clean up will delete data, cookies, and will close all opened applications and any information used during the session to leave the system ready for next meeting.

Object & Handwriting Recognition

Start drawing by hand and then use our self-recognition tools (words, images and shapes) to turn your notes into digital contents. Choose from list of suggested cliparts when you draw an object. Handwritten words will be converted to typed text to make your documents look more professional.

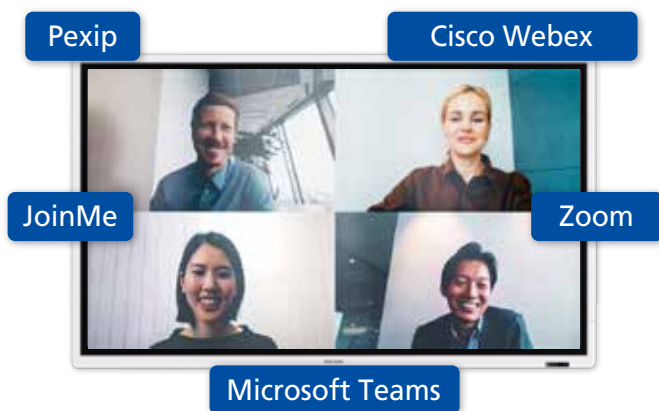

Remote Whiteboard

Connect your laptop, mobile device or other interactive whiteboard from anywhere in the world. Users can interact on the canvas from remote locations simultaneously for clear communication among the team and maximize collaboration.

Easily join remote meetings

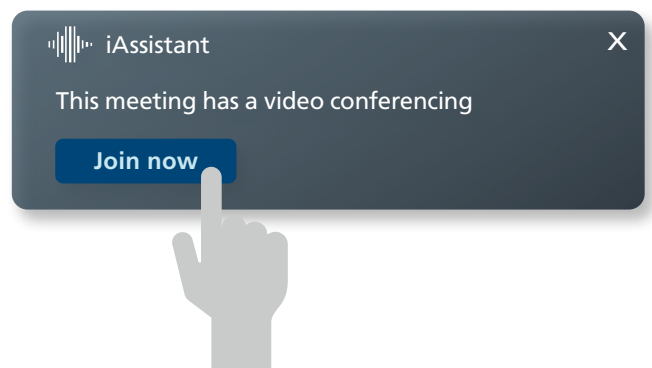

Your interactive whiteboard grants you access to most of the video conferencing systems on the market. Joining the virtual room will be as easy as a tap.

Multiple Vendor Support

Most of the video conferencing systems on the market are supported.

Skype for business | Microsoft Teams | Cisco Webex | GoToMeeting | Google Cloud | Zoom | Pexip | Lifesize | Conx Video Meeting | Join me

One Tap to Join

When the link of the meeting is included in the invitation, the virtual assistant will automatically notify you to join the video conference with one tap, regardless of which video conferencing system you're using.

Assist your meeting

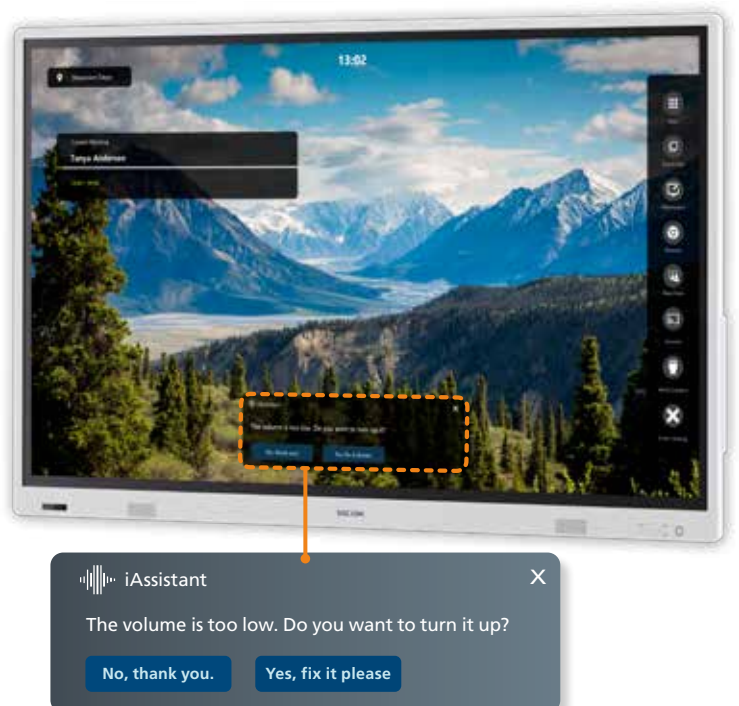

During the entire meeting, a virtual assistant will guide you to execute the main activities. It will make sure to adapt the technology of the interactive whiteboard to guarantee the best possible comfort.

Technical Adjustment

Virtual assistant offers adjustments for smooth meeting and device management when necessary.

-  System Health
-  Turn Volume Up
-  Join Meeting
-  Extend Meeting Time
-  Finish Meeting

Technical Requirements

RICOH Creative Collaboration for Interactive Whiteboard

- BOARD TYPE: D3210, D5530, D5520, D6520, D6510, D7510, D7500, D8600
- BOARD CONTROLLER: SMART CONTROLLER OP5 or OP10 (Microsoft Windows10 1809 minimum version)
- OTHER OPTIONS: CAPTURE BOX required for wired connection
- CONFERENCE CAMERA
- MICROPHONE (with noise cancellation recommended)
