Future-proof technology at your fingertips

At last! A printing system that doesn't stress everyone out. Things have changed. Our new multifunction printer (MFP) is the intelligent device you've always wanted to scan, copy and print your Letter/A4 size documents. This color MFP has a smart touchscreen control panel and is always running the latest technology.

Putting up with old equipment until your contract finally ends is out. Software that automatically updates is in — along with the ability to add additional functionality that your business may need in the future. Your MFP is always ready to operate. You can print, copy and scan more materials — faster and remotely from wherever you are. Just plug in this intelligent device and let it run. You'll be glad to know our A4 and A3 MFP models work in exactly the same way too.

With output speeds ranging 40 A4 size pages per minute, these devices — along with their optional paper trays — allow you to meet just about any type of print job requirement. Plus, the trays hold more paper than ever before, so you spend less time refilling them. You won't need to budget for extra services or equipment either.

It’s the 2020s, and you’re right to demand an MFP that can keep up with your dynamic digital workplace.

Scalable document handling options that grow with your business.

Modern devices all interact with one another. Why should your MFP be any different? With Ricoh, you can not only scan documents to a folder on your network but also add third-party apps and cloud services. You decide which features your device does and doesn’t have. You’ll only see options for the services you use, so you can get to them quickly and without any fuss.

Secure handling of your documents and data

For complete security across your network, your MFP runs Ricoh’s own operating system. This gives you complete control over who sees and doesn’t see the documents you process. Your MFP can overwrite your data at the end of every print run, so no sensitive information is ever leaked. You decide who has access to every document, restricting access to select information.

Sustainable design to take you far into the future

Ricoh MFPs are designed to be Eco-friendly and energy efficient. Committed to sustainability using 10% post-consumer recycled plastic in the mainframe. We also have a deep commitment to minimizing the environmental impact of our devices and workflow, which is why we continually work to meet the global standards for energy and resource efficiency, as defined by EPEAT®* and ENERGY STAR®. Ricoh devices have low energy consumption levels, in both Typical Electricity Consumption (TEC) and actual power consumption.

**EPEAT is only applicable in the USA.*

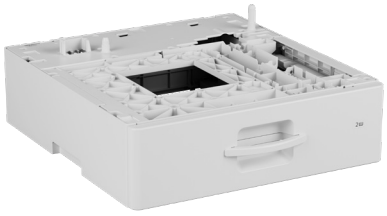

Simple systems to make your working life easier

All our devices operate like one machine, because the control panels and technology are exactly the same. You won't waste time figuring out how to scan or print every time you use another machine. Our 10.1" tilting touchscreen is as intuitive to use as your smartphone, so cryptic control panel messages are now a thing of the past. Add your company logo, personalize your device for different team members and use it to watch how-to videos — or get help online.
