Let's make your printer the foundation to digital ways of working

The office landscape has changed tremendously in the last few years. As more people work from home, digital workflows are opening up a wealth of new possibilities. At the same time, extra security and environmental challenges have emerged. Our latest IM C Series is the market leader in environmental performance. It ensures your data will always be protected and offers employees an enhanced experience. These smart multi-taskers have everything you need to be your partner in creating the digital gateway to a hybrid workplace.

• Be sustainable thanks to leading TEC values and more recycled plastic
• Secure your data and safeguard business critical documents
• Stay up to date with the latest device technology and customization options
• Work smarter thanks to improved usability and productivity

Designed for your workplace today…

Ricoh's intelligent devices support you in optimising the potential of a digitally enabled hybrid workplace. The newest generation IM C Series offers employees a great experience with easy operation and flawless results. From upgraded scanning and paper handling to secure access, they are the ideal foundation for your digital ways of working.

... and tomorrow

The ability to connect and consolidate technologies and devices is a great benefit of digitalisation. Ricoh helps you digitise your document workflows and enables swift yet secure access to information when needed. Add software solutions, apps and cloud services and customise your device, not just now but in every stage of your business growth.

The new benchmark in sustainability

The new IM C Series leads the industry in environmental performance. We make a difference not just through our own commitments but by supporting your targets too. We help you save energy and minimise your environmental footprint. As well as identifying new opportunities for reuse and recycling, we have reduced Typical Energy Consumption (TEC) values to the lowest on the market and added scanning features to promote digitisation.
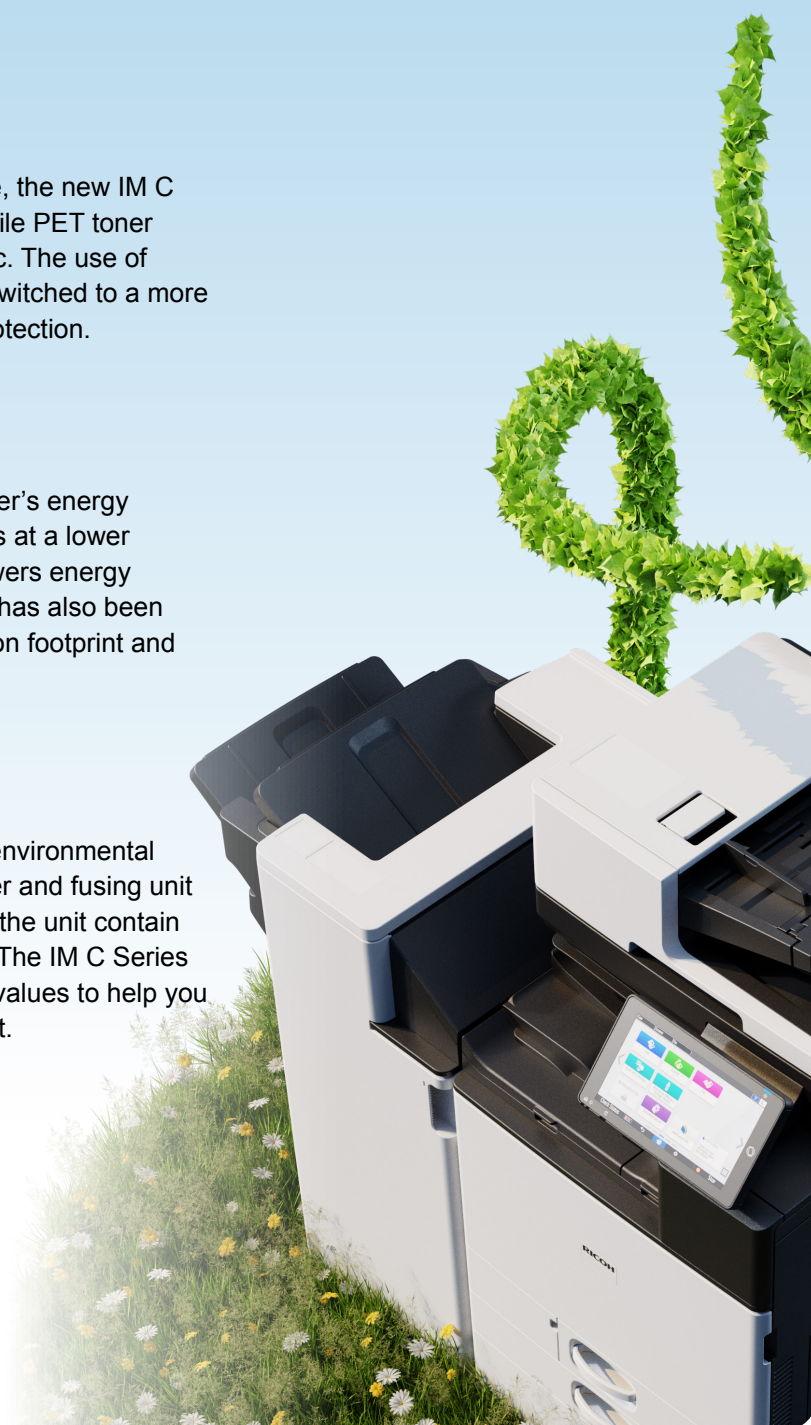

More recycled plastic

Designed for sustainability across its lifecycle, the new IM C Series is made of 50% recycled materials while PET toner bottles are produced of 100% recycled plastic. The use of plastic packaging is reduced by 50% as we switched to a more sustainable material and removed excess protection.

More energy savings

Toner fixing accounts for up to 70% of a printer's energy consumption. By using a new toner that fuses at a lower temperature, our IM C Series significantly lowers energy consumption. The sleep mode power supply has also been reduced, helping you achieve a smaller carbon footprint and lower costs.

Supporting a circular economy

At Ricoh, we are committed to reducing our environmental impact and promoting sustainability. The toner and fusing unit are both reusable and the materials used for the unit contain 50% recycled content – an increase of 45%. The IM C Series top that with efficient scanning and low TEC values to help you reduce your business' environmental footprint.

Reliable protection of your data

The digital transformation has enabled new ways of working, but it also raises challenges when it comes to protecting sensitive data. Our IM C Series are designed, manufactured and implemented with end-to-end security protection as a core requirement. Its secure cloud infrastructure ensures safe access from anywhere, anytime. As well as meeting the latest security requirements, it integrates a new admin management system and Ricoh's Always Current Technology for extra peace of mind.

Privileged account control

This feature gives you more freedom when creating MFP administrator roles. The number of admins is no longer limited to just four, eliminating risks related to sharing IDs. You can assign different privileges to each role and link it to your user ID system, including Windows and LDAP platforms.

Always Current Technology: sustained value

Ricoh's ACT gives you ongoing access to the latest security features and upgrades. New ACT tools include WPA3 authentication for wireless encryption and the latest version of the hardware security module (TMP 2.0). You can also restrict the network by port name and protocol as well as IP address.

Supporting your entire digital journey

As your business grows, you need the right technology to take advantage of new opportunities. And as the digital transformation progresses, you need the right partner to help you stay ahead. Ricoh's eco-friendly intelligent devices are ready to adapt to your changing needs: they offer customisation, flexibility and reliable updates.

Technology that grows with you

Discover the freedom of smart scalablity. With the IM C Series you can tailor your device as your business develops. Simply download the latest features, upgrades and applications as you need them. With the right solutions, your employees can work smarter not just now but in the future as well.

Always at the leading edge

Forget the days of buying a new device every time you need updated technology. With our Always Current Technology, new features, apps and upgrades can be downloaded and installed directly to your device on request. You don't have to wait until the end of a contract and no need to call a technician.

Transition to cloud printing & document management

Our software solutions readily available from the cloud allow you to enhance the capabilities of your print device. You can also securely connect mobile devices to carry out tasks from your phone or tablet. Our scalable document management applications drive significant cost savings alongside process improvements. By taking print to the cloud, you can set location-aware printers and enable users to print anywhere, anytime.

Enhanced productivity and user satisfaction

The IM C Series creates the ultimate employee experience with numerous features that save time and increase efficiency. Its digital technologies give you the power to create smooth, automated workflows that accelerate processes and encourage collaboration. New peripherals enhance paper handling while the user interface is attractive and easy to use.

Third-generation Smart Operation Panel

Our familiar, user-friendly IM C operation panel has been upgraded for an even more intuitive and enjoyable experience. Brightness, touch sensitivity and position detection have all been improved for optimal access to the device's many resources and functions.

User comfort comes first

The latest intelligence:

• Android OS 10 for better security and usability
• Slot-in card reader for quick installation
• Easier access to internal tray
• Improved touch sensitivity
• Tiltable for better visibility and accessibility

New efficiencies in paper handling

New peripherals have been added to ensure professional results along with extra, automated finishing possibilities. The single pass double-sided document feeder capably handles high volumes, smaller sizes and special paper types and cardstock. High-end options include a hybrid and booklet finisher for that extra touch.

The choice is yours

Simple and sophisticated, friendly and professional, the new IM C Series is the perfect match for your way of working. Ricoh's trusted quality and technical expertise are evident from every angle. Take a closer look!

IM C2010 / IM C2510

Added value for your business

- 20 to 25 ppm A3 all-in-one printer for all-round support
- Fast warm-up time of 24 seconds
- Power consumption (B/W, in operation) of only 503.3 W
- Sleep mode: 0.55 W
- TEC value as low as 0.34 kWh/week

IM C3010

Next level intelligent multitasker

- 30 ppm A3 all-in-one printer for high productivity
- Fast warm-up time of 24 seconds
- Power consumption (B/W, in operation) of only 503.3 W
- Sleep mode: 0.55 W
- TEC value: 0.39 kWh/week

IM C4510 / IM C6010

A true digital document centre

- Productive 45 to 60 ppm A3 all-in-one printer for top performance
- Super fast warm-up time of 24 seconds
- Power consumption (B/W, in operation) of only 532.9 W
- Sleep mode: 0.55 W
- TEC value: 0.39 kWh/week

Hardware configuration

- 3,000 sheets Finisher
- SPDF
- ARDF
- Hybrid 1,000 sheets Finisher With Staple/ Staple-less Finisher
- Banner Paper guide tray
- Staple-less Inner Finisher
- 1,500 Sheet LCT
- 1,000 sheets Booklet Finisher
- 1bin-Tray
- 550 x 2 Bank (w/o Auto close)
- Shift Tray
- 1000 x 2LCT
- Caster table
- Inner finisher
- Bridge Unit
- 550 x 1 Bank
- Inner Multi Folding Unit
